End of preface:

This next string is searched by EIRENE in subroutine SLREAC to initialize search for a particular set of fit coefficients. From here on, a character string ‘**H.n**’, n an integer, must only appear in the section title, but not in the text. Likewise: identifiers p0, a0, b0, ..., h0, k0 are used in SLREAC and must not appear in the text elsewhere, from here on.
